DETAILED ACTION

1. Restriction is required under 35 U.S.C. 121 and 372.

Election/Restrictions

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-44 drawn to establishing discounted programs for members of an organization, classified in class 705, subclass 14.
 - II. Claims 45-49 drawn to processing information over a network, classified in class 709, subclass 218.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as processing information in real time over a network. This separate use distinguishes the invention of group I from group II since the feature of real time processing is not a limitation of group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
